

VIRAL RNA EXTRACTION KIT

Designed to Enable Automated Purification

The Randox extraction kit is designed for the optimal automated extraction of nucleic acid and purification of high-quality RNA.

-  Efficient and automated purification of nucleic acid material
-  Extraction from nasal/throat swabs following brief lysis steps
-  Convenient room temperature storage
-  Yields highly concentrated nucleic acids that are ready to use in downstream applications such as qualitative or quantitative PCR
-  Available for use on any automated extraction platform
-  Low sample volume of 200µl required
-  Quick assay protocol
-  Automated extraction platform available from Randox
