

Important Product Update

Dear Valued Customer,

Over the next few months, you may notice some changes on the label of your Randox product.

In line with UK/CA registration requirements the UK/CA mark will be added to new batch/lot numbers of all products and IFUs. This will allow the products to be placed in the UK market.

The GS1 matrix barcode which is on all Randox labels includes information on the products GTIN, expiry date and lot number. The Human Readable form will also now be located beside the GS1 matrix.

Kind Regards,
Randox Laboratories
